**TEK PAK ACUIRES 5 NEW HAAS CNC MACHINES**  
*Adding capacity to the Toolroom*

Batavia, Illinois, May 18, 2020 – Tek Pak, Inc. is proud to announce the addition of 5 new HAAS CNC machines to extend capacity to our expansive toolroom. “Tek Pak continues to grow and invest to bring the latest capabilities along with the fast lead times our customers have come to expect and depend on from us” according to Todd Buck, Tek Pak’s Toolroom Manager.

Tek Pak purchased four new VF-3SSYT HAAS machines with working window of 40” x-axis, 26” y-axis as well as a UMC-750 5-axis machine with x-axis 30”, y-axis 20” working window. These new 15,000 rpm Spindle, through-spindle coolant, High-speed machines along with our current VMC HAAS super mini mill, DM-1, VF-2, VF-5 and VF-8 as well as the UMC FADAL 3320, 3016 x2, 6030, 4025, 2016-L x2 and 2015-HS-II will take our customers concept to market in record times. Tek Pak also has a full design staff with extensive experience working with CAD software, Solidworks, CAM software and MasterCam programs.

Tek Pak is fully committed to our Thermoforming division with Rapid Prototyping and production scale thermoforming lines, Certified ISO 9001, ISO 13485, FSSC22000 and Certified class 8 clean room.

We are excited to be growing and helping move forward US production with US made machines. Stay strong, stay safe.
